

“Speed Ordering” processes mobile payments without Wi-Fi or the Internet

10p
Per Transaction

We add an API to your existing App and Payment Gateway Server. Your clients do not have to install any other App. “Speed Ordering” will reduce the number of failed transactions and is activated when the connection is lost.

The API interrogates your server and sends data to the specific database fields for your Payment Gateway to process. It’s instantaneous and works in the background.

“Speed Ordering” is patented Worldwide

How did "Speed Ordering" start?

In 2014 a Favourite Meal could be Reordered using "Speed Ordering"

Speed Order

- You do not have WiFi, but no worries, you can place an order from your favourites list without an internet connection.
- Below please find the list of favourite meal orders saved by you.
- Click on one of your favourite orders and place the order and pay for it.
- We are the first food ordering App to list multiple restaurants and takeaways and process orders for favourite meals without WiFi or an internet connection.
